

"Our students are loving Dash Station! It has been a great addition to recess and has increased physical activity during the school day."

Alicia Knickerbocker,
SHAPE Colorado
Elementary PE Teacher of the Year (2021)

Support active fun!

Dash Station is a solar-powered running station that lets children and adults see how fast they can run and compare their time to the fastest of the day.

By encouraging movement and friendly competition, the Dash Station promotes healthy living wherever it is placed — and you can choose the placement!

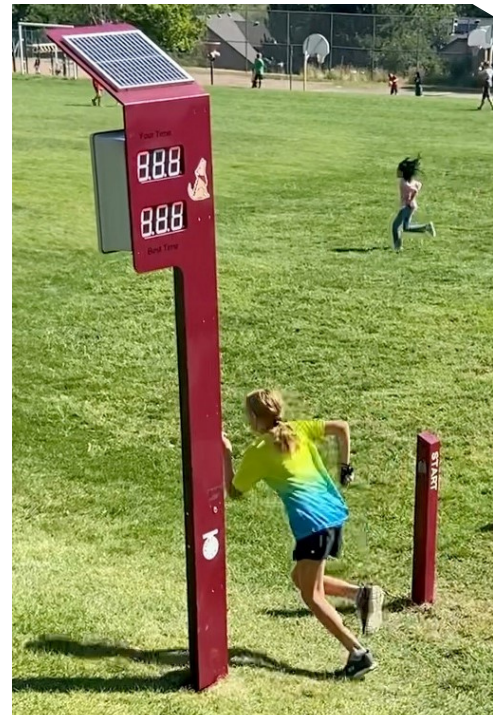

A measurable difference.

Because your Dash Station records the number of uses, you can see the the impact it is having.

At our pilot school, Dash is used about 1000 times/week, and 30% of those uses are outside of school hours, which means that families are using it, too.

Easy to install and maintain.

Because Dash Station runs on solar and battery power, you can install it anywhere. And it is virtually maintenance-free.

Order your Dash Station today.

Call Dave at 720-840-4261 or email info@dash-station.com to learn more.
