

The Dash Station's **Dash DUO** is a solar-powered and wireless running timer for playgrounds and parks that measures how fast you run and compares it to the fastest time of the day.

Start side and finish side can be placed from 10 yards - 75 yards apart and require no external power source.

Made of weatherproof materials and is virtually maintenance-free. Comes with 1-year warranty and is built to last for years. Simple installation requires cementing posts into ground.

### Available Colors\*:

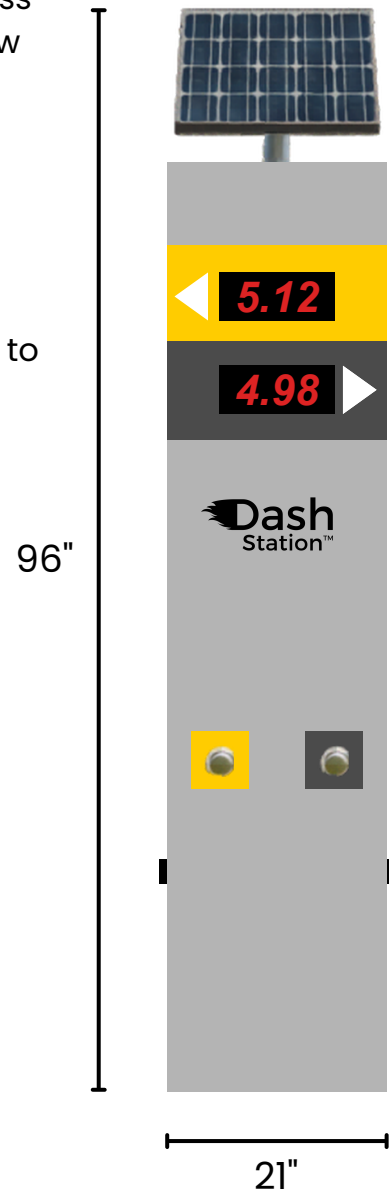

\*Customizable with your logo and color choice!

See example of a **Dash Station Classic** in action:
